

PROTECTING SCHOOLS THROUGH **STERAMIST®** DISINFECTION

Surfaces within educational facilities come in contact with numerous students and staff each day, which can increase the likelihood of hazardous cross-contamination. This transfer of bacteria and viruses can result in increased absences, negative facility reviews, and even costly closures.

Utilizing ionized Hydrogen Peroxide (iHP™) - a non-caustic, chlorine and bleach-free aerosolized fog - SteraMist® treatments can effectively disinfect a facility at any time with TOMI™ Service Network providers.

Whether a routine disinfection or emergency disinfection, a TOMI™ Service Network (TSN™) provider can be deployed at a moments notice. Let TSN™ give you an advantage with a new standard of disinfection within your educational facility.

- The ultimate tool for elimination of bacteria & viruses such as **Staph, MRSA, Norovirus, H1N1,** and **salmonella.***
- Easily incorporated into current cleaning procedures.
- Reduces the risk of cross-contamination of infectious diseases between students and staff.
